COMMON MAXIMUM LIABILITY

You benefit from a *Common Maximum Liability* which is calculated as [xx] times of the premium paid per *insurance period* / set at [x] [currency] of the participating **CGS Contracts** per *insurance period* ('*Common Maximum Liability*'). This *Common Maximum Liability* applies to this **Contract** as follows:

- The *Common Maximum Liability* replaces the *maximum liability* under your **Contract**, accordingly the indemnities related to the **CGS Contracts** will be paid in chronological order of the indemnification, up to the *Common Maximum Liability*.
- Each indemnity will be paid by the **Insurer** of the **CGS Insured** that incurs the claim.
- No Insurer is liable to indemnify claims as soon as the *Common Maximum Liability* is reached or reduced following a premium refund. If You benefited from a payment above the actual *Common Maximum Liability* You will have to refund it to us.
- If a **CGS Contract** benefits from a *Specific Maximum Liability* attached to a **Buyer**, this *Specific Maximum Liability* does not modify the *Common Maximum Liability* calculation describe above, however if the *Specific Maximum Liability* is triggered to pay an indemnity, this indemnity will be deducted from the *Common Maximum Liability*.
