## 科法斯產物貿易信用保險集團最高責任限額附加條款(A)

110.10.08 科保字第1100087號函備查

M\_CLA\_GGRPML\_02\_ST

### GROUP MAXIMUM LIABILITY

*Group Maximum Liability* is calculated as [x] times of the premium paid per *insurance period* / set at [xx] [currency] and corresponds to the maximum amount payable.

A *Group Maximum Liability* for a given **CGS Contract** can either be a *Common Maximum Liability* or a *Linked Maximum Liability*.

For the calculation of the Subgroup 1 Linked Maximum Liability all **CGS Contracts** participating in a Subgroup 2 Common Maximum Liability form one individual maximum Liability incorporated in Subgroup 1 the Linked Minimum Liability.

### COMMON MAXIMUM LIABILITY

Is calculated as [xxx] times of the premium paid per *insurance period* / set at [xxxx] [currency] and corresponds to the maximum amount payable.

For **CGS Contracts** participating in a *Common Maximum Liability* each indemnity will be paid by the **Insurer** of the **CGS Insured** that incurs the claim.

### LINKED MAXIMUM LIABILITY

Is calculated as [y] times of the premium paid per *insurance period* / set at [yy] [currency] and corresponds to the maximum amount payable.

In each **CGS Contract** an individual maximum liability is set. As soon as the individual maximum liability is to be exceeded the **Head of Insured Group** decides who of the participating **Insured(s)** will waive part of its(their) Individual Maximum Liability under its(their) **CGS Contract(s)** to transfer this capacity for a further indemnification under the **CGS Contract** which needs it.
